WORK EXPERIENCE

Python—OpenERP Developer and Instructor
Actualmente **Covetel · Venezuela.**
OpenERP module and drivers development, specially Point of Sale and Fiscal Printers. Python, Plone, OpenERP Technical and Funcional Instructor.

Project Management
oct.2011–jul.2012 **Brightcomms · El Salvador.**
Development department leader responsible for all company software development circle. Development manager for all local and overseas developers using agile development techniques. Implementation of open source software solutions for enterprise use.

Python & Django Development
jul.2011–oct.2011 **Brightcomms · Nicaragua.**
Telecommunication services provider logs extraction from Sybase to external Postgresdb and subsequent processing, analysis and visualization in different types of tables and graphs, reports generated in HTML and PDF, plus web and email delivery. Simple web administration interface with KPI creation, and custom reports creation suite. Due to high volume of data, many optimization methods where implemented. (Django, Sybase, jQuery, jQuery-ui).

GNU/Linux Development
2008–2011 **CNTI · Venezuela.**
Integration of many FLOSS technologies into the Operative System and platform to be used by all the Venezuelan Public Administration (Canaima GNU/Linux). This became an important basement for all social and technological projects such as -Canaima Educativo- wich gives laptop per child, filled with open source software intended for education.Partnered by the Information Technologies National Center (CNTI) all open source and community oriented. Debian based. (Python, Bash, pyGTK, Django, Xen)

Teaching
3D Blender Animation · Basic Intensive Course · 3D presentations · Duration: 1 Week · **FLOSS Academy**
Blender Advanced · Intensive Advanced Course· Postprod and edition · Duration: 1 Week · **FLOSS Academy**
Python Basic · Python basic programming · General introduction, plus version control system (git) · Duration: 3 days · **FLOSS Academy**

Internship & Engineering Design
2007–2008 **Huawei Technologies · Venezuela.**
6-month internship, and former Engineer in EDD (Engineering Design Department) for the deployment of Huawei UMTS technologies for local telecommunications provider: Movilnet.

FORMAL EDUCATION

OpenERP Open
Business Solutions

Python

SysAdmin

Network Admin

Engineering
